Re: Soudal SMX 30Plus

I have currently been using your adhesive for over 18 months, since I went into business for myself. I approached Josh at Marquees Flooring about other adhesives that did not have solvents and VOC's in them and he put me onto the Soudal SMX 30Plus and I have never looked back.

Unlike other adhesives I have used over the years it always cures the same every time and I have found it better to work with when towelling and cleaning up.

The adhesive sticks like sh*t to a blanket and does not let go. It works well on hotter days and I just ensure I lay the timber before the adhesive skins. Clean up from your hands is very easy, it comes off your skin, once cured, with hot soapy water and a sponge.

I have also converted other companies, that I do work for, to the Soudal products as well, they have also been happy with its performance. The adhesive is priced very well considering how well it works. I personally put the SMX 30Plus above other brands like Sika, Bostik & Selleys.

Soudal have done what they say using no solvents and VOC's which is what I like even more and integrity of my work is better.

And best of all no more polyurethane headaches!
